CAREER OBJECTIVE

Enthusiastic and motivated beginner-level MERN Stack Developer with a BS in Computer Science seeking an opportunity to apply my foundational knowledge of MongoDB, Express.js, React.js, and Node.js. Passionate about building modern web applications and eager to grow through hands-on experience in a collaborative environment.

EDUCATION

Bachelor of Science in Computer Science (BS-CS) — Global Institute Lahore

Final Year Project (FYP): *Online University Timetable Generator* | Tech: PHP, MySQL

- Designed and developed a web-based system to automatically generate university timetables online.
- Implemented conflict-free scheduling logic for rooms, teachers, and subjects using PHP backend.
- Built an admin panel for managing departments, courses, faculty, and time slots.
- Used MySQL for structured data storage of schedules, rooms, and academic records.
- Enabled timetable export and print functionality for students and faculty.

INTERNSHIP & COURSES

IT Internee — OGDCL (2 Months) | Islamabad, Pakistan

Internship in the IT Department of Oil & Gas Development Company Limited (OGDCL)

MERN Stack Developer Certification (3 Months) | Lahore, Pakistan

Certification in MERN Stack Development — NAVTTC

Flutter Developer Certification (3 Months) | Lahore, Pakistan

Certification in Flutter Development — Excellence Delivered (Tech Lift Program)

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Bootstrap, React Bootstrap

Backend: Node.js, Express.js, PHP

Mobile: Flutter (Basic)

Databases: MongoDB, MySQL

Tools & Others: Git, GitHub, VS Code, Postman, REST APIs

Currently Learning: Full MERN Stack Integration, JWT Authentication, Deployment

PROJECTS

Event Management System | Tech: React.js, Node.js, Express.js, MongoDB

- Developed a full-stack web application to manage events, bookings, and reservations.
- Implemented features for event scheduling, booking management, and client records.
- Used MongoDB as the database and Express.js for building RESTful APIs.

News App | Tech: React.js, REST API

- Built a dynamic news application that fetches and displays real-time news articles.
- Integrated a third-party News API to retrieve categorized news content.
- Implemented category-based filtering and responsive UI using React components.

Weather App | Tech: React.js, OpenWeather API

- Created a weather application displaying real-time weather data for any searched city.
- Used OpenWeather API to fetch temperature, humidity, and weather conditions.
- Designed a clean, responsive interface with dynamic weather icons.

Live: <https://second-react-app-1abb7.web.app>

E-Commerce Website | Tech: React.js, Node.js, Express.js, MongoDB / MySQL

- Developed a fully functional e-commerce web app with product listings and cart functionality.

- Built user authentication and product management features.
- Connected frontend with backend APIs for dynamic product data rendering.

Live: <https://first-react-app-4cab7.web.app>

Portfolio Application | Tech: HTML, CSS, JavaScript, React.js

- Designed and developed a visually engaging application.
- Focused on creative UI/UX with smooth animations and responsive layouts.
- Showcased advanced CSS techniques and component-based design using React.
